Minseok (Denis) Kim

Department of Computer Science and Engineering
Sungkyunkwan University

for8821@g.skku.edu · deniskim1.com · GitHub · Google Scholar

EDUCATION

Ph.D., Software	*Sungkyunkwan University* Advisor: Hyungjoon (Kevin) Koo	In progress
M.S., AI Systems Engineering	*Sungkyunkwan University* Co-advisors: Hyungjoon (Kevin) Koo and Jinyeong Bak. GPA 4.5 / 4.5.	
B.A., Software	*Sungkyunkwan University*	

HONORS & AWARDS

— Winner, AI Prompting Challenge (APC'26) — July 2026

RESEARCH INTERESTS

— Adversarial robustness of advanced AI systems — Retrieval-Augmented Generation, agent communication protocols (MCP, A2A), and autonomous-agent trust boundaries.

— Trust-boundary security analysis for autonomous AI agents, with emphasis on the shift from output safety to behavioral safety.

— Large language models for cybersecurity — binary analysis, reverse engineering, and code similarity detection.

— Agent-driven C-to-Rust transpilation: autonomous coding agents that translate legacy C into idiomatic, memory-safe Rust while preserving behavior.

— Defenses against data poisoning and prompt injection: lightweight post-retrieval filtering for RAG and runtime guards for tool-calling agents.
